

MULUND COLLEGE OF COMMERCE (AUTONOMOUS)

Programme: School of Business – (Business Administration)

Class: SY Semester: III

Exam: External

Name of the Subject: FINTECH for BUSINESS

Date of Exam: 06-10-2025

Marks: 60

Time: 2 hours

Instructions: 1) Figures to the right indicate maximum marks.

2) All Questions are Compulsory

Q1 Read the following case study and answer the given questions 12

The Indian Income Tax system, governed by the Income Tax Act, 1961, has undergone a major digital transformation through fintech integration, making tax administration more transparent, efficient, and user-friendly. Traditionally paper-based and time-consuming, filing and paying taxes has shifted to online portals and mobile apps that allow taxpayers to e-file returns, pay digitally via UPI, net banking, or wallets, and track refunds with ease. Initiatives like PAN–Aadhaar linkage have simplified identity verification and reduced tax evasion, while AI-driven systems and pre-filled ITRs have cut errors and compliance costs. These reforms have improved transparency, widened participation, and encouraged compliance by reducing manual intervention and corruption. Fintech platforms such as ClearTax and TaxBuddy further simplify filing with AI-based assistance, while digital GST and TDS reporting enhance accountability. Benefits include greater convenience, faster refunds, data analytics for better policy-making, and increased trust in the tax system. However, challenges remain, such as the digital divide for rural or less tech-savvy users, frequent regulatory changes, technical glitches, and risks of data breaches due to centralized financial data. Overall, India's income tax digitization—powered by fintech—has modernized compliance and collection, promoting a transparent, technology-driven taxation ecosystem, but its long-term success depends on inclusivity, system reliability, and robust data security.

- A** Discuss how the integration of fintech has transformed the Indian Income Tax system
- B** Highlight the key applications, benefits, challenges of this digital shift.”

Q2 Answer the following (any 2) 12

- A** Categories the key technologies that drive the FinTech industry?
- B** Explain FinTech Evolution 1.0, and how did it lay the groundwork for future developments in financial technology?
- C** Defines FinTech Evolution 3.0 and 3.5, and how do they differ from the earlier phases?

- Q 3** **Answer the following (any 2)** **12**
- A** Classify multichannel digital wallets, and Explain Open Wallets and Semi closed Wallets
- B** Explain how does P2P lending work, and what role does Fintech play in facilitating this form of lending?
- C** Differentiate crowdfunding and traditional lending, and how do Fintech platforms facilitate crowdfunding for personal and business needs?
-
- Q 4** **Answer the following (any 2)** **12**
- A** Explain 4G networks contributed to the growth of the Fintech industry?
- B** Explain how cloud computing transformed the Fintech industry, particularly in terms of scalability and cost-efficiency?
- C** Explain the use of Big Data transformed the way Fintech companies understand and serve their customers?
-
- Q 5** **Answer the following (any 2)** **12**
- A** Describe Fintech Evolution 2.0 (1987-2008) and its impact on the banking industry.
- B** Explain Microfinance Pros and Cons of Microfinance
- C** List the potential applications of IOT in payments, lending, and wealth management?
