2) All Questions are Compulsory

Q1	Read the following case study and answer the question	10
-----------	--	-----------

A Water Purifier Company has introduced a new product in the last month. The customers are giving a mixed review about the product. Design a questionnaire to understand the product experience with at least three types of questions (open-ended, dichotomous, Likert scale) (minimum 8-10 questions).

Q2	Answer the following (any 2)	10
-----------	-------------------------------------	-----------

- A** Explain descriptive research and its benefits in business
- B** Discuss with the help of examples on secondary research
- C** As a Marketing manager how can you conduct Primary research to understand the customers reactions on a new flavour of the health drink

Q 3	Answer the following (any 2)	10
------------	-------------------------------------	-----------

- A** A smartphone company wants to gauge customer interest in a new, high-end model. They need to survey 1,000 potential customers across a large metropolitan area that is known to have distinct socioeconomic neighborhoods. Which sampling technique should they use to ensure a representative sample, and why?
- B** You have completed a quantitative study on the impact of employee wellness programs on productivity. The target audience for your report includes senior management, who need a quick overview of the key findings, and human resources (HR) managers, who require detailed methodology and data.

Describe how you would structure your report to meet the different needs of these two key audiences.

- C** A research team conducted a study involving vulnerable populations (e.g., individuals recovering from addiction). How should the final report apply ethical reporting practices to protect participants while still presenting crucial findings?
